

SR-8 DRAGON CLAW DESIGN COLD SAW BLADE

It has a uniquely designed angle that can be resharpening to extend cutting lifespan.

TECHNICAL NOTE

ANGLE DESIGNATION

Chamfer angle	1
Radial Clearance angle	2
Negative angle	3
Hook angle	4
Top angle	5
Saw Diameter	D
Bore hole	B
Pin hole Diameter	P
Pin hole Pitch	L
Kerf	K
Saw body thickness	S
Teeth of saw	T

SR-8 Dragon Claw Design Cold Saw Blade

There has three types cold saw blade that developed for different cutting material.

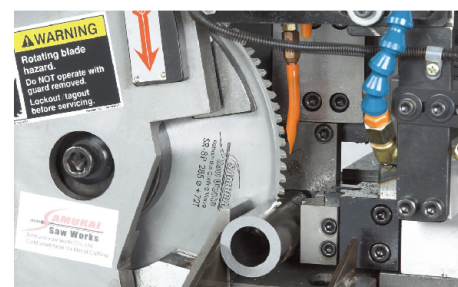

SR-8

- Best-Seller and regular product.
- Suitable for cutting solid alloy and carbon steel, Such as S45C (1045) \ SCM415 (4115)...and so on.

SR-8S Stainless cold Saw Blade

- Using tungsten carbide tips.
- Especially for cutting stainless steel (SUS) only.

SR-8P Short Tips Cold Saw Blade

- Short tips type.
- Best choice for cutting pipe and tube.

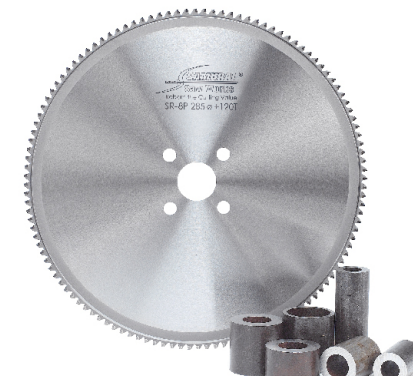

SR-8

Suitable for cutting solid alloy and carbon steel.

SR-8S Stainless cold Saw Blade

Especially for cutting stainless steel (SUS) only.

SR-8P Short Tips Cold Saw Blade

Best choice 120 teeth for cutting pipe and tube.

RETRIEVE the cutting value for you

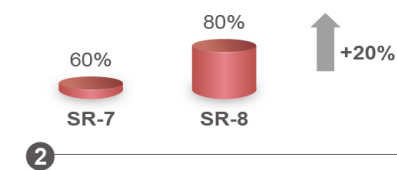

Features of SR-8 Saw blade

1. New "Dragon Claw" design reinforces the combination of tips and saw body.
2. New "Bevel Wing" designs that reduce friction and extend cutting lifespan.
3. Using new NANO cermet carbide tips.
4. SR-8 has increased more 30% cutting lifespan than SR-7 after a long-term test.
5. Not only does Re-sharpened saw blade guarantees no loss from quality, but it also increases cutting lifespan and keeps the cost down.
